EXCELLENCE IN BAG MANUFACTURING

SIGMA

"Premium quality, at the best price, delivered on-time"

COMPANY PROFILE

Sigma is a company that manufactures and provides customized packaging solutions. We offer an extensive range of products, including PP Woven Bags/Sacks, BOPP Bags, AD Star Cement Bags, LDPE liner Bags, Jumbo Bags, and more. Our focus is on creating tailor-made solutions that meet the specific packaging needs of our clients. We offer competitive prices and high-quality products. "Our goal is to create and provide durable, cost-effective, and efficient packaging solutions for various industries."

We are proud of our highly skilled and dedicated team, who have over a decade of experience in manufacturing. This ensures that our customers receive consistent quality and on-time delivery, fulfilling our promise. Our advanced machinery enables us to produce and fulfill bulk orders with ease. We not only meet our customers' packaging needs but also offer branding support by using graphics, logos, and personalized messages that are printed on their customized packaging bags/sacks. We use high-quality inedible ink to ensure clear and better printing. Additionally, we use up-to-date machinery to ensure that the products have a long-lasting stitch.

Our location in the central of United Arab Emirates provides easy access to land and sea routes for our customers in the local and wider GCC region. Our supply chain is quality-controlled, and we take special care to procure the best raw materials for our manufacturing process. We are committed to ensuring that you receive the quality you deserve.

MISSION STATEMENT

"Experience the satisfaction of receiving the best quality product that is available at the most competitive price, delivered to you right on time."

OUR SERVICES

PRODUCTS

POLYPROPYLENE (PP) BAGS

PP Woven Sacks are made from the finest Polypropylene and they have proved their excellence for packaging in several industries around the world.

Features:

- Flexible and high strength
- Affordable price
- Used in multiple industries
- Wide range of sizes and quantities
- Weight range from 3-100Kgs ...
- With or without Lamination
- With or without Liner
- One or both side printing
- With or without UV Protection

Uses:

- Foodstuff Industries
- Fertilizer Industries
- Animal Feeds
- Charcoal
- Spices
- Rice, Wheat & Sugar
- Flour Mills
- Agricultural products etc...

BOPP BAGS

BOPP Stands for - Biaxially Oriented Polypropylene, these bags are produced by laminating a reverse printed film to a woven fabric which is then manufactured into a bag. BOPP is a polypropylene film that is applied as an additional layer to woven PP bags.

Features:

- Photographic printable
- Superior strength over PP bags
- Bold, colorful and high quality printing
- Excellent for marketing purposes
- Highly Customizable
- Looks attractive and have a long life

Uses:

- Rice & Pulses
- Flour
- Sugar
- Grains and seeds
- Fertilizers and pesticides
- Animal Feed etc...

AD *STAR BAGS / BLOCK BOTTOM BAGS

AD*Star bag refers to a PP Woven bag that is filled using a valve. Commonly referred to as block bottom valve bag or PP woven valve bag, and no adhesives are required to seal the bag.

Features:

- Stronger than Paper or PE Bags
- High in strength
- Maximum tear protection
- Cost-effective
- Non-fading print
- Resists Water & Humidity

Uses:

- Cement, gypsum & lime
- Sugar, Cocoa & Coffee
- PP/PE/PVC Resins
- Seeds
- Fertilizers
- Chemical Industries

FIBC / JUMBO BAGS

Flexible Intermediate Bulk Container Bags - FIBC also known as Jumbo Bags, are one of the cost effective types of packing for storage and transportation of a wide range of materials such as chemicals, food, metal etc. Manufactured from tubular/ flat woven fabric, these bags have a large storage capacity. These bags are custom designed as per the client's requirement, thus offering a wide range of bags to choose from.

Features:

- SWL Range: 500kgs to 2000kgs
- Fabric: Coated / Uncoated
- Liner: Tubular / Shaped
- With or without printing
- Various Top and Bottom construction options

Uses:

- Cement, Gravel, Sand and Stones
- Chemicals and Petrochemical products
- Pharmaceuticals
- Food products: Flour, Wheat, Sugar
- Spices, Milk Powder etc...
- Granule or powdered bulk products
- Grass, Animal feed & Fertilizers
